○ WELCOME TO

RADHA ENGINEERING

RADHA ENGINEERING “Mild Steel Specialist & A Stainless Steel” growing inorganically in manufacturing a wide range of stainless steel & mild steel products that are widely acclaimed for their durability & appealing innovative designs. Designed and fabricated to perfection, the different types of our Industrial fabrication products. The organization has centered its fixation on New undertakings like Manufacture of Fabrications, Industrial Trolleys, Industrial Working Tables, Cooling Tower Pipe Line, Air Pipe Line, Steam Pipe Line, All Type of Chimney Work, Industrial RO Plant, Industrial MS Tank Works.

○ RADHA ENGINEERING SPECIALIST IN

INDUSTRIAL TROLLEY MANUFACTURE

We are assembling great modern Industrial trolleys with compelling Strength, Durability and conveying limit. Our entire scope of mechanical trolleys are utilized as a part of different Vehicles commercial ventures for various purposes. These Mechanical Industrial trolleys are accessible in different shapes and sizes. We make the Mechanical Industrial Trolley in such a way, to the point that they suit the particular necessities of the customers demands.

HANGER TYPE TROLLEY

ALL TYPE OF CHIMNEY WORKS

We have developed Industrial Chimneys with the integration of sophisticated technologies to make them highly suitable to get ventilation for hot flue gases or smoke from a boiler, stove, furnace or fireplace to the outside atmosphere. These are generally installed to the flue gas stacks and are generally external structures, as opposed to those built into the wall of building. At the time of designing these chimneys, we do consider factors such as height and diameter, required amount of excess combustion air needed to assure complete combustion, material as per the specification of our clients.

INDUSTRIAL MS TANKS

We have technologically developed Industrial Storage Tank that is used as a container to hold liquids, compressed gases. These are cylindrical in shape, upright to the ground with flat bottoms and come with flat floating roof. Our storage tanks are developed on the basis international standards and parameters that make them demanded on world market too. These storage tanks are highly preferred for their unique features including corrosion resistance, weather proof surface, anti-leakage and sturdy structure. We make them available in various capacities in both mild and stainless steel.

STEAM PIPELINE

we have been able to manufacture and supply an extensive range of Steam Pipe Line. Our skilled professionals manufacture this Steam Pipe Line from premium quality materials and ultra-modern technology in accordance with predefined industry standards. Customers can avail this Steam Pipe Line from us in different specifications as per their requirements. This Steam Pipe Line is duly checked by our quality experts on various parameters of quality.

COOLING TOWER PIPELINE

We are engaged in offering our clients a wide range of Cooling Towers, which is either made up of wood or fiber glass reinforced plastic. Our Cooling Towers are widely used in various industries for cooling of water flow. In addition to this, our efficient workforce helps us in providing spare parts and maintenance services for all types of cooling towers.

○ MILD STEEL WORKING TABLES

Our comprehensive range of industrial Work Table & Benches are designed and manufactured to provide quality long-lasting work and storage solutions. Our selection of heavy duty work benches is complemented by a vast range of industrial storage equipment which includes industrial cupboards, computer cabinets, mobile maintenance workbenches, tool cabinets, CNC storage systems, small parts storage systems and industrial chairs/seating.

○ STAINLESS STEEL WORKING TABLES

We are an appreciated name in the market for offering Stainless Steel Work Table. The offered tables are made of supreme quality stainless steel material. The benches are constructed with the help of skilled and diligent workforce. The offered tables are mainly used in various places. Our benches are known to have accurate shape and size. Our tables give a trendy in appeal and occupy minimum areas. This product is tested under the inspection of professionals against the parameters of quality to avoid the production faults.

INDUSTRIAL RO PLANT

We are one of the established industrial RO plant manufactures in chennai catering to industries across Tamilnadu. As an industrial RO plant Manufacturer, We supply a whole range of custom-built industrial RO Plant for a variety pf applications that are process-specific. Our Industrial RO plants are high-end products with advanced automations and remote monitoring devices. Eg., PLC, SCADA, RMS. All these terms are used to denote a RO plant that reduces that salinity of the water for a wide range of applications and segments.

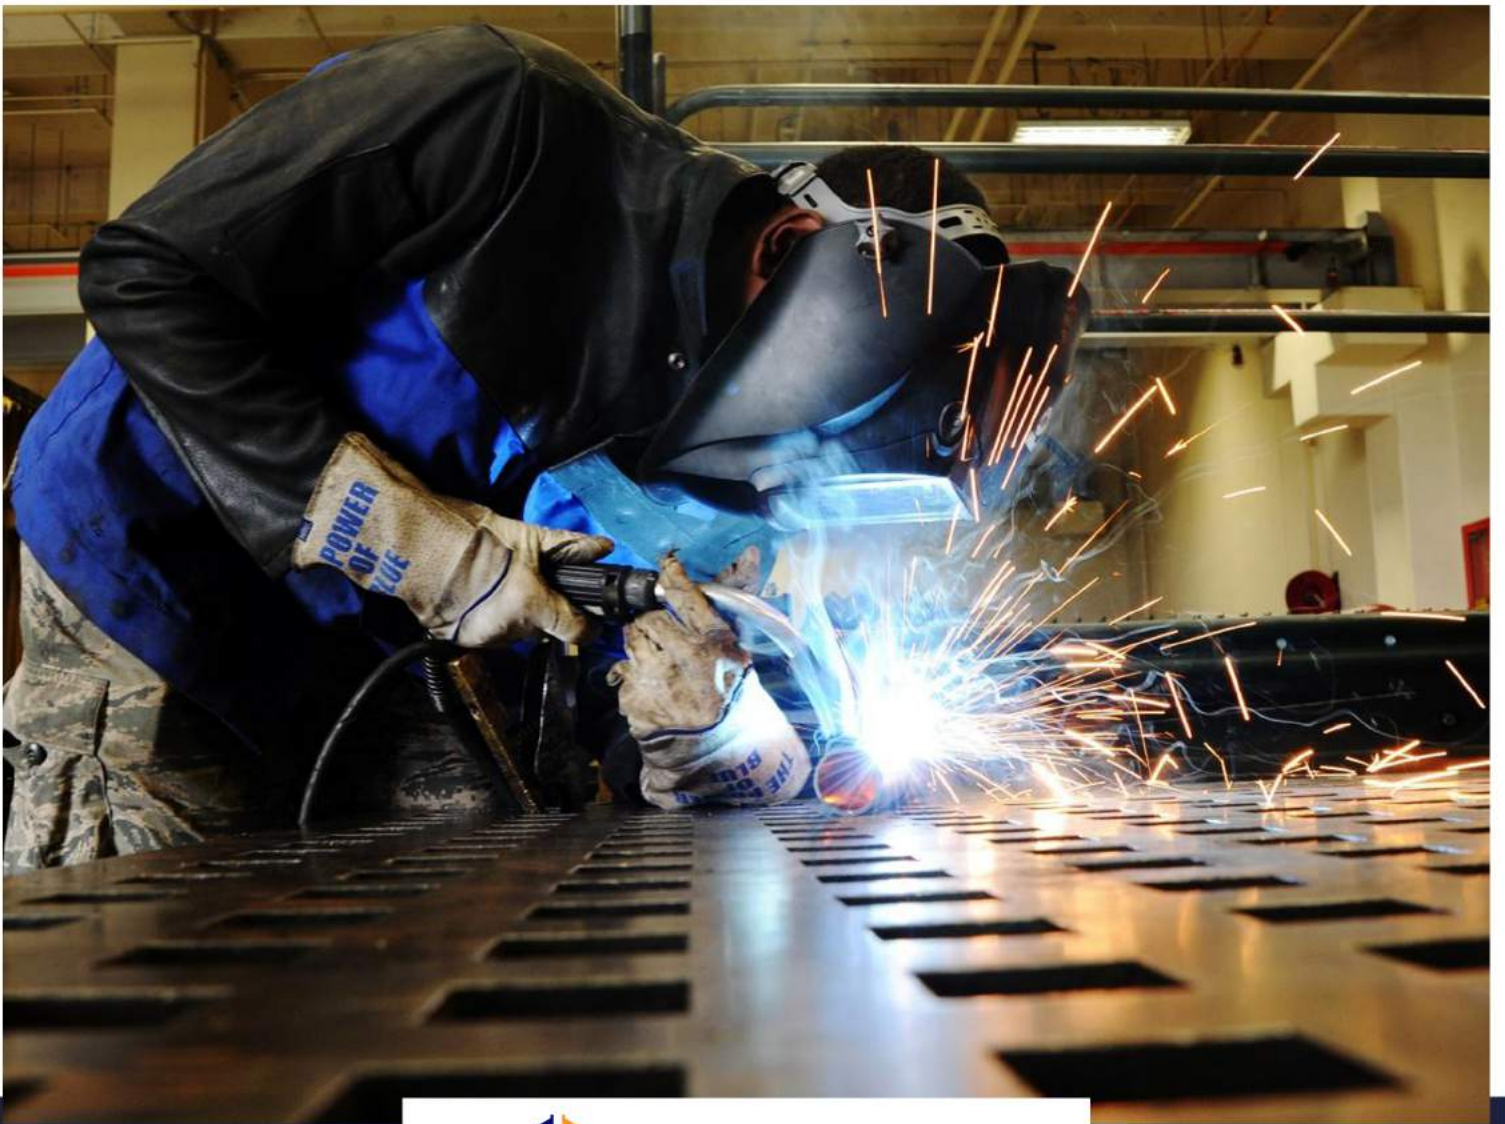

LPH COMMERCIAL RO SYSTEM

This system is useful to separate impurities and salt present in the brackish water. After treatment, it leaves you with water that is safe and consumable. It can be a lifesaver for the industries who manufacture products related to water. Talk about optimal performance and no to minimal maintenance; this is one of the RO plants that will stand tall.

COMPACT COMMERCIAL RO SYSTEM

There are many other kinds of RO water treatment plants like the Turnkey Mineral Water Project, wherein minerals are added to water, Industrial RO system where water passes through UV sterilization and many more. All the water plants work towards making the water safe, healthy and consumable.
